Do It With Style Lab Developer Journal

Zhihao Cao

In this lab assignment, I have amended my last lab assignment by adding radius, shadow, gradient, font, transition, multi-column and opacity.

The skills I learnt:

1. Adding border-radius in variant type

2. Adding shadow, with 3D effect

3. Setting gradient

4. Adding Internet font

5. Transition, hovering over the text or images, something change

6. Multi-column, looks like magazine

7. Opacity, looks more beautiful.

Problems:

It is really hard to find free font from the Internet

I love the transition but it is so hard. I don't know how to put moving images in my page.

Almost coordinate problem
